

**SINCE GOLDEN'S
EARLY DAYS...**

Pat and Brett Soles, 2 of the 3 founding partners have been involved in the timber and wood manufacturing business for most of their lives, and are fourth generation entrepreneurs in the timber rich Columbia Valley of BC.

CANADIAN TIMBERFRAMES LTD. TAKES ITS RESPONSIBILITY TOWARDS THE ENVIRONMENT SERIOUSLY.

The Douglas fir used in our timber frames is harvested locally from "sustainably" managed forests, ensuring that these forest eco-systems maintain their bio-diversity, regeneration and vitality. Maximum utilization of the log, along with utilization of the by-product, allows for a healthy environment. In Canada specifically, we harvest less than 1 percent of our trees, and plant over half a billion seedlings a year.

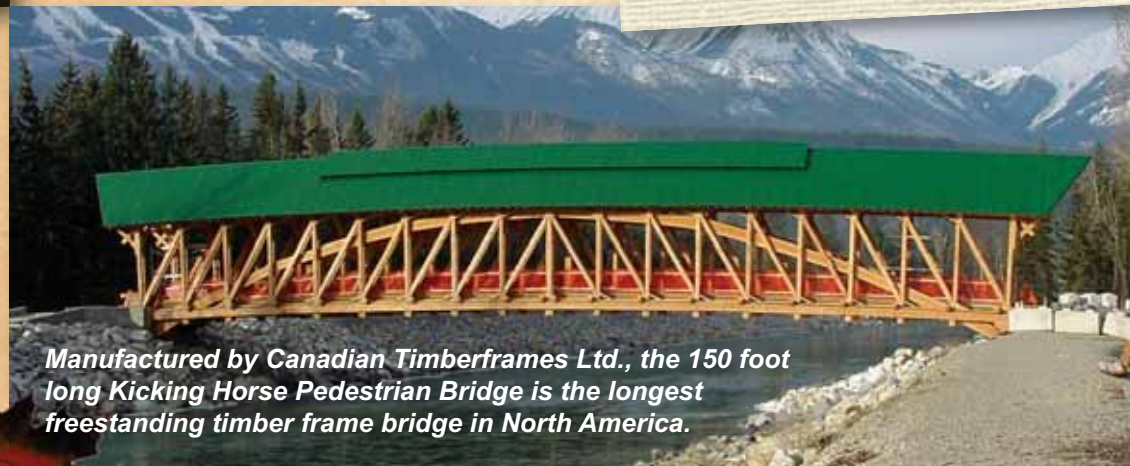

**WOOD IS A NATURAL,
RECYCLABLE AND
RENEWABLE RESOURCE.**

"After over a decade of being one of the premier suppliers of exceptional timber frame structures in the industry, I invite timber frame enthusiast's to learn more of Canadian Timber Frames recent and ongoing focus to better assist our clients throughout Canada and the United States. I am excited and confident that our passion for what we do will be evident in our work, and in the resulting relationships.

We truly look forward to hearing from you."

~ JEFF BOWES, Partner & Director,
Business Development and Marketing
CANADIAN TIMBERFRAMES LTD.

Manufactured by Canadian Timberframes Ltd., the 150 foot long Kicking Horse Pedestrian Bridge is the longest freestanding timber frame bridge in North America.
