TIMBERFRAME TOUR DE FORCE

A homeowner with a vision, a master piece in the making and a timber frame company that can deliver scale, speed and creativity. The strength of timber frame is exemplified in this home; the overall effect is one of impressive strength and solidity. The Douglas fir timbers were scaled up to match the mass of the 10,500 sq.ft. building. The massive timbers were rough sawn, burned, wire brushed, stained and enhanced with heavy steel to create this uniquely rustic ambiance. For the full story and many more incredible photos go to canadiantimberframes.com/project/hilltopretreat and get ready to be inspired.

BRINGING YOU VALUE

Summer time, a time to relax a bit more, enjoy the outdoors, BBQ'ing & dining under the stars. An energetic time of year. We have harnessed that energy and brought several exciting changes to our product, services and operations. We've expanded our team and have brought on several new suppliers to compliment your project and add value to the bottom line. Through our new partnerships with Loewen Windows and CanWel Building Materials Group, CTF has expanded our product offering as well as, the ability to provide exceptional value to customers and builders improving our service, price & product.

Our reputation as one of the world's premiere timber frame companies is

built on a foundation of quality, precision, and passion for the time-honored craftsmanship of timber framing. From building that glamorous getaway, to creating a new cottage deck, timber additions or expansions to existing buildings, or a complete new customized home for your family, we can assist you with your 2015 goals.

Drop us a line @ sales@canadiantimberframes.com or call 1.877.348.9924 - let us know where we can help you out.

As seen in Hideaways Magazine...

Coming to a Muskoka dock near you! See one of our finished masterpieces in this 9-page feature in the 2015 edition of Cottage Country Hideaways Magazine. To view magazine feature please go to canadiantimberframes.com/hideawaysfeature

DESIGN UPDATE: REDSTONE, COLORADO THE RUSTIC STONE PROJECT

To view all design images go to canadiantimberframes.com/project/rusticredstone

NEW PLANER

Our new Hundegger planer is quite the impressive piece of machinery! It's planer heads use a revolutionary centrifugal clamping method for the planer knives. This permits higher RPM and consequently increased feed and improved cutting quality.

What does this really mean to you? The Hundegger's computerized sizing module allows us to get your timber exact not just close; it also allows us

to plane much larger pieces of timber – we can now plane 16"x24"x50'...so, for those of you who want to build an impressively large space & have timbers to carry the volume; we're your people!

IT'S IN THE DETAIL

by Alison Noble,

Architect - Blue Sky Architecture, P.C.
from Frisco, Colorado USA.

The blog covers all you need to know about building a new home and working with an Architect.

Meet Gavin Roberts - Architectural Designer

Having graduated Architectural Construction Engineering Technology Gavin has joined the CTF team

with an education and training in the most cutting-edge software; one being Building Information Modelling (BIM)

which provides the ability to showcase the design of a home by creating views from a 3D model. This also allows for a client to virtually walkthrough their soon-to-be home before ground has even been broken; ensuring that the home will provide a space that the home-owner will enjoy, and be proud to call their own.

"Creating this relationship between the design and the client is one of the most enjoyable and exciting experiences about working at CTF. I constantly strive to incorporate innovative construction practices to create a higher standard of construction details, which ultimately results in a more efficient home and a seamless build for the owner and contractor." Says Gavin.
